TRANSMISSION

TH 76 is equipped with fully Powershift transmission sourced from the internationally renowned ZF, with heavy duty clutch packs for smooth and easy gear shift.

The integral Torque converter has stall ratio of 1:2.63 which increases the tractive effort, making dozing operation easy in tough conditions. Powershift transmission facilitates "on the move clutch less gear shift" through the click of the knob both in forward and reverse direction.

AXLES

Front Axle

The rigid non-powered front axle for two wheel drive version can float 180 to take care of unevenness of ground.

Rear Ayle

Rear ZF Multitrac Axle is a heavy duty, long-life axle. High brake torque is assured by internal wet multi-disc brakes that are self adjusting and require little maintenance. Parking Brake is spring applied hydraulically released which is enclosed in the axle housing and provides full protection from damage, dirt and corrosion.
