

Software testing company relies on Hitachi Unified Compute Platform for VMware vSphere

Cigniti Technologies is headquartered in Irving, Texas, US, with offices in Australia, United Kingdom, India and Canada.

"Hitachi Data Systems was able to provide the solution we needed, along with all the requisite parameters of access, ease of management, performance, reliability and a whole lot more."

Cigniti Technologies

CHALLENGES

Rapid business growth and acquisitions

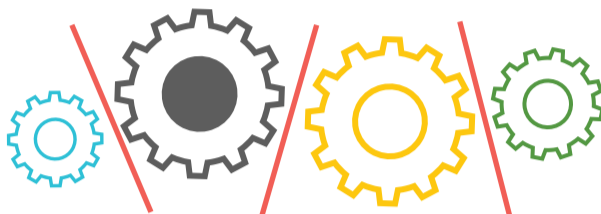

Increasing administrative and operational expenditures (opex)

Back-end IT issues hampering testing activities

Difficulties with provisioning, utilization, and availability and performance

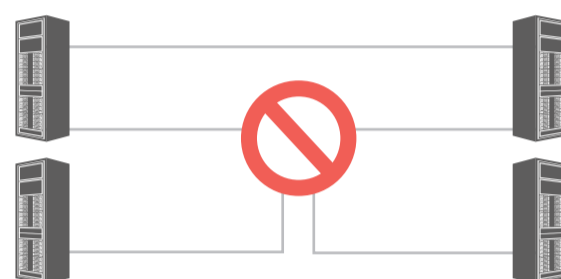

Needed to consolidate and virtualize disparate components

Data center inefficiencies also slowed time to market

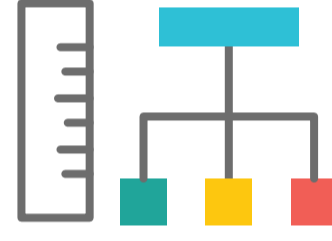

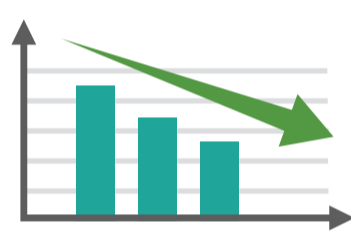

Sprawling, dispersed IT infrastructure with **no centralized management**

RESULTS

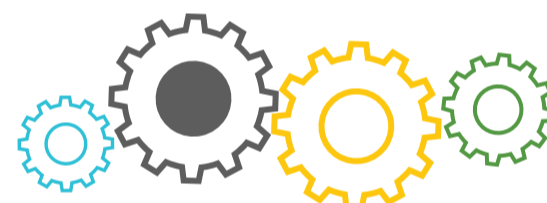

Cost reduction, with better resource utilization, and energy efficient, right-sized infrastructure

Improved customer service, with greater uptime and better staff productivity

Improved provisioning, performance and application availability

Single, seamless interface manages end-to-end IT infrastructure

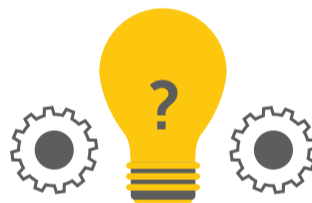

Virtualized, converged IT environment

Less time spent

Managing

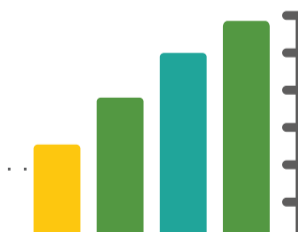

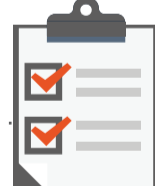

Troubleshooting

Fixing technical issues

Superior reliability, improved accuracy and testing time, greater scalability and simplified administration all **support future business growth**

Optimized server infrastructure enables faster testing, development and quality assurance processes

SOLUTIONS

Hitachi Unified Compute Platform (UCP) for VMware vSphere

Hitachi Compute Blade 500

Hitachi Unified Storage 100

Hitachi storage adapters and connectors
